INTERFACE OVERVIEW

This manual describes how to use the GDS-1000-U's remote command functionality and lists the command details. The Overview chapter describes how to configure the GDS-1000-U USB remote control interface.

Rear Panel Overview

Configuring the USB Interface

| | | |
|----------------|----------------|----------------------|
| USB connection | PC end | Type A, host |
| | GDS-1000-U end | Type B, slave |
| | Speed | 1.1/2.0 (full speed) |

- Procedure
1. Connect the USB cable to the USB slave port on the GDS-1000-U.

 2. When the PC asks for the USB driver, select dso_cdc_1000.inf which is downloadable from the GW website, www.gwinstek.com.tw, GDS-1000-U product corner.
 3. On the PC, activate a terminal application such as MTTTY (Multi-Threaded TTY). To check the COM port No., see the Device Manager in the PC. For WindowsXP, select Control panel → System → Hardware tab.
 4. Run this query command via the terminal application.
*idn?
This command should return the manufacturer, model number, serial number, and firmware version in the following format.
GW, GDS-1052-U, 000000001, V1.00
 5. Configuring the command interface is completed. Refer to the programming manual for the remote commands and other details.

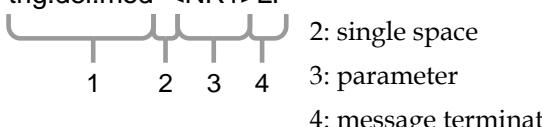

COMMAND OVERVIEW

The Command overview chapter lists all GDS-1000-U commands in functional order as well as alphabetical order. The command syntax section shows you the basic rules you have to apply when using commands.

Command Syntax

- Compatible standard
- IEEE488.2, 1992 (fully compatible)
 - SCPI, 1994 (partially compatible)
-

Command format `trig:del:mod <NR1>LF` 1: command header

| Parameter | Type | Description | Example |
|-----------|-----------|------------------|-----------------|
| | <Boolean> | boolean logic | 0, 1 |
| | <NR1> | integers | 0, 1, 2, 3 |
| | <NR2> | decimal numbers | 0.1, 3.14, 8.5 |
| | <NR3> | floating point | 4.5e-1, 8.25e+1 |
| | <NRf> | any of NR1, 2, 3 | 1, 1.5, 4.5e-1 |

| | | |
|--------------------|-----------|--------------------------------------------------|
| Message terminator | LF^END | line feed code (hexadecimal 0A) with END message |
| | LF | line feed code |
| | <dab>^END | last data byte with END message |

Note Commands are non-case sensitive.

List of Command in Functional Order

| | | |
|----------------|----------------------------|----|
| System | *IDN..... | 12 |

C OMMAND DETAILS

The Command details chapter shows sysntax in detail, the equivalent panel operation, and an example for each command. For a list of all commands, see page 7.

| | |
|---------------------------------|----|
| System command | 12 |
| Acquisition Command..... | 14 |
| Autoset Command | 17 |
| Channel / Math Command..... | 18 |
| Cursor Command..... | 23 |
| Display Command..... | 27 |
| Measure command | 30 |
| Go No-Go Commands..... | 40 |
| Data Log Commands | 50 |
| Save/Recall Command | 53 |
| Time (Horizontal) command | 58 |
| Trigger command | 61 |

System command

| | |
|----------------------|----|
| *IDN | 12 |
| *LRN | 12 |
| *RST | 13 |
| :SYSTem:ERRor | 13 |
| :SYSTem:VERSiOn..... | 13 |

*IDN

→  Query

| | |
|-------------|---------------------------------------------------------------------------------------------|
| Description | Returns the oscilloscope ID: manufacturer, model name, serial number, and firmware version. |
| | Same as: Utility key → F4 |

| | |
|--------|-------|
| Syntax | *idn? |
|--------|-------|

| | | |
|---------|---------------------------------------------|-------------------------------------|
| Example | *idn? GW, GDS-1052-U, 00000001, V1.00 | Returns the ID for a GDS-1052-U. |
|---------|---------------------------------------------|-------------------------------------|

*LRN

→  Query

| | |
|-------------|-----------------------------------------------------|
| Description | Returns the oscilloscope settings as a data string. |
|-------------|-----------------------------------------------------|

| | |
|--------|-------|
| Syntax | *lrn? |
|--------|-------|

| | |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Example | *lrn? :DISPlay:WAVeform 0;ACCumulate 0;CONTrast 9;GRATicule 0;CHANnel1:DISPlay 1;BWLimit 0;COUPling 0;INVert 0;OFFSet 5.000e-01;PROBe 1;SCALe 5.000e-02;;CHANnel2:DISPlay 1;BWLimit 0;COUPling 0;INVert 0;OFFSet 5.000e-02;PROBe 0;SCALe 5.000e-02;CHANnel1:MATH 0;:TIMEbase:SWEep 0;SCALe 1.000e-08;DELay 0.000e+00;WINDow:SCALe 1.000E-09;DELay 0.000E+00;ACQuire:MODE 0;AVERage 0;:TRIGger:TYPE 0;SOURce 0;MODE 1;SLOP 0;COUPLE 1;REject 0;NREJ 0;LEVel 0.000E+00;PULSe:MODE: 0;TIME 0.000E+00;:VIDeo:TYPE 1;POLarity 1;FIELD 1;LINE 1;:CURSor:SOURce 1;XDISPLAY 0;X1Position 75;X2Position 175;YDISPLAY 0;Y1Position 54;Y2Position 154;:REF1:DISPLAY 0;LOCate 50;:REF2:DISPLAY 0;LOCate -50;:RUN |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

RST*Set** →

| | |
|-------------|-------------------------------------------------------------|
| Description | Resets the GDS-1000-U (recalls the default panel settings). |
| | Same as: Save/Recall key → F1 |

| | |
|--------|------|
| Syntax | *rst |
|--------|------|

:SYSTem:ERRor→ **Query**

| | |
|-------------|-------------------------------------------------------------------|
| Description | Returns the oscilloscope system error messages, if there are any. |
|-------------|-------------------------------------------------------------------|

| Syntax | < Long > | < Short > |
|--------|----------------|------------|
| | :system:error? | :syst:err? |

| Parameter | ID | Contents | ID | Contents |
|-----------|------|-------------------|------|-------------------|
| | -100 | command error | -102 | syntax error |
| | -220 | parameter error | -221 | settings conflict |
| | -222 | data out of range | -223 | too much data |
| | -224 | illegal parameter | -232 | invalid format |

| | | |
|---------|------------------------|--------------------------------------------|
| Example | :system:error? -102 | Indicates that the command syntax is wrong |
|---------|------------------------|--------------------------------------------|

:SYSTem:VERSion→ **Query**

| | |
|-------------|-----------------------------------------------------------------------------------------------------|
| Description | Returns the oscilloscope firmware version. Same as: Utility key → F4 (only the firmware version) |
|-------------|-----------------------------------------------------------------------------------------------------|

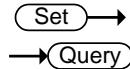

| Syntax | < Long > | < Short > |
|--------|------------------|-------------|
| | :system:version? | :syst:vers? |

| | |
|------|----------------------------------------------------------------------------------------------|
| Note | For retrieving all system information including the firmware version, use the *idn? command. |
|------|----------------------------------------------------------------------------------------------|

Acquisition Command

| | |
|-------------------------|----|
| :ACQuire:AVERage | 14 |
| :ACQuire:MODe | 14 |
| :ACQuire<X>:MEMory..... | 15 |

:ACQuire:AVERage

Description Selects or returns the average number of waveform acquisitions that are used in the average acquisition mode.

Same as: Acquire key → F2

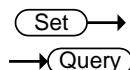

| Syntax | < Long > | < Short > |
|------------------------|----------|-----------------|
| :acquire:average <NR1> | | :acq:aver <NR1> |
| :acquire:average? | | :acq:aver? |

| Parameter | <NR1> | Average No. | <NR1> | Average No. |
|-----------|-------|-------------|-------|-------------|
| 1 | 2 | 5 | 32 | |
| 2 | 4 | 6 | 64 | |
| 3 | 8 | 7 | 128 | |
| 4 | 16 | 8 | 256 | |

Note Before using this command, select the average acquisition mode. See the example below.

| | | |
|----------------|--------------------|-----------------------------------------------------------------------|
| Example | :acquire:mode 2 | Selects the average acquisition mode, and select the average number 4 |
| | :acquire:average 2 | |

:ACQuire:MODe

Description Selects or returns the acquisition mode.

Same as: Acquire key → F1 ~ F3

| | | | | |
|-----------|---------------------|-----------------------------------------------------------------------|----------------|---------|
| Syntax | < Long > | | < Short > | |
| | :acquire:mode <NR1> | | :acq:mod <NR1> | |
| | :acquire:mode? | | :acq:mod? | |
| Parameter | <NR1> | Mode | <NR1> | Mode |
| | 0 | Normal | 2 | Average |
| | 1 | Peak detect | | |
| Example | :acquire:mode 2 | Selects the average acquisition mode, and select the average number 4 | | |
| | :acquire:average 2 | | | |

:ACQuire<X>:MEMory

→(Query)

| | | | | | | | | | |
|-------------|--------------------------------------------------------------------------------------------------------|----------------------|-------------------------------------|--------------|--|--|--|--|--|
| Description | Returns the total waveform data in the acquisition memory. | | | | | | | | |
| Syntax | < Long > | | < Short > | | | | | | |
| | :acquire<X>:memory? | | | :acq<X>:mem? | | | | | |
| Parameter | <X> | Channel | | | | | | | |
| | 1/2 | Channel1/2 | | | | | | | |
| Example | :acquire1:memory? | | Returns the channel 1 waveform data | | | | | | |
| Data format | Six data elements are concatenated to form one data string. | | | | | | | | |
| | # A B C | D E F | | | | | | | |
| | A: Data size digit | B: Data size | | | | | | | |
| | C: Time interval | D: Channel indicator | | | | | | | |
| | E: Reserved data | F: Waveform data | | | | | | | |
| | Data size digit | | | | | | | | |
| | Indicates the number of digits used for the data string that follows. The data size digit is always 4. | | | | | | | | |

Data size

Indicates the data size. The data size is always 8008 (4000 points per channel).

Time interval

Indicates the time interval between two adjacent sampling points in the floating point format, compatible with IEEE 754 standards.

Note: The data is sorted in the little-endian format.

Channel indicator

Indicates the channel, 1 or 2.

Reserved data

An unused data block, 3 bytes.

Waveform data

The waveform data comprised of 8000 data points. Each point is made up of 2 bytes (16 bits), high byte (MSD) first.

Autoset Command

:AUToset

 Set →

Description Runs the Autoset function to automatically configure the horizontal scale, vertical scale, and trigger according to the input signal.

Same as: Auto Set key

| | | |
|--------|----------|-----------|
| Syntax | < Long > | < Short > |
| | :autoset | :aut |

Channel / Math Command

| | |
|----------------------------|----|
| :CHANnel<X>:BWLimit..... | 18 |
| :CHANnel<X>:COUpling | 18 |
| :CHANnel<X>:DISPLAY | 19 |
| :CHANnel<X>:INVert | 19 |
| :CHANnel<X>:MATH | 20 |
| :CHANnel<X>:OFFSet..... | 20 |
| :CHANnel<X>:PROBe | 21 |
| :CHANnel<X>:SCALE | 21 |

:CHANnel<X>:BWLimit

 Set →

→  Query

Description Selects or returns the bandwidth limit on/off.

Same as: Channel key → F3

Syntax

| | |
|-------------------------------|--------------|
| < Long > | < Short > |
| :channel<X>:bwlimit <Boolean> | :chan<X>:bwl |
| :channel<X>:bwlimit? | <Boolean> |
| | :chan:bwl? |

Parameter

| <X> | Channel | <NR1> | Limit |
|-----|---------|-------|-------|
| 1/2 | CH1/2 | 0 | Off |
| | | 1 | On |

Example

| | |
|---------------------|--------------------------------------------|
| :channel1:bwlimit 1 | Turns on the bandwidth limit for Channel 1 |
|---------------------|--------------------------------------------|

:CHANnel<X>:COUPling

 Set →

→  Query

Description Selects or returns the coupling mode.

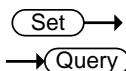

Same as: Channel key → F1

Syntax

| | |
|----------|-----------|
| < Long > | < Short > |
|----------|-----------|

| | | | | |
|-----------|----------------------------|---------|---------------------|-----------------|
| | :channel<X>:coupling <NR1> | | :chan<X>:coup <NR1> | |
| | :channel<X>:coupling? | | :chan:&coup? | |
| Parameter | <X> | Channel | <NR1> | Coupling mode |
| | 1/2 | CH1/2 | 0 | AC coupling |
| | | | 1 | DC coupling |
| | | | 2 | Ground coupling |

Example :channel1:coupling 1 Selects the DC coupling for Channel 1

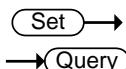

:CHANnel<X>:DISPLAY

Description Turns a channel on/off or returns its status.
Same as: Channel key

| | | | | |
|--------|-------------------------------|--|----------------|--|
| Syntax | < Long > | | < Short > | |
| | :channel<X>:display <Boolean> | | :chan<X>:disp | |
| | :channel<X>:display? | | <Boolean> | |
| | | | :chan<X>:disp? | |

| | | | | |
|-----------|-----|---------|-------|----------------|
| Parameter | <X> | Channel | <NR1> | Channel on/off |
| | 1/2 | CH1/2 | 0 | Off |
| | | | 1 | On |

Example :channel1:display 1 Turns on Channel 1

:CHANnel<X>:INVert

Description Inverts a channel or returns its status.
Same as: Channel key → F2

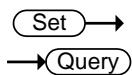

| | | | | |
|--------|------------------------------|--|---------------|--|
| Syntax | < Long > | | < Short > | |
| | :channel<X>:invert <Boolean> | | :chan<X>:inv | |
| | :channel<X>:invert? | | <Boolean> | |
| | | | :chan<X>:inv? | |

| | | | | |
|-----------|-----|---------|-------|----------------|
| Parameter | <X> | Channel | <NR1> | Channel invert |
|-----------|-----|---------|-------|----------------|

| | | | |
|-----|-------|---|-----|
| 1/2 | CH1/2 | 0 | off |
| | | 1 | on |

Example :channel1:invert 1 Inverts Channel 1

:CHANnel<X>:MATH

Description Selects or returns the math operation type.
Same as: Math key → F1

| Syntax | < Long > | < Short > |
|--------|------------------------|---------------------|
| | :channel<X>:math <NR1> | :chan<X>:math <NR1> |
| | :channel<X>:math? | :chan<X>:math? |

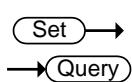

| Parameter | <X> | Channel | <NR1> | Math operation |
|-----------|-----|------------|-------|----------------|
| | 1/2 | CH1 or CH2 | 0 | Math off |
| | | | 1 | Add |
| | | | 2 | Subtract |
| | | | 3 | FFT |

Example1 :channel1:math 2 Channel 1 – Channel 2

Example2 :channel2:math 2 Channel 1 – Channel 2

Example3 :channel2:math 2 Runs FFT on Channel 2

:CHANnel<X>:OFFSet

Description Sets or returns the offset level for a channel. The offset level range depends on the vertical scale.

| Syntax | < Long > | < Short > |
|--------|--------------------------|---------------------|
| | :channel<X>:offset <NR3> | :chan<X>:offs <NR3> |
| | :channel<X>:offset? | :chan<X>:offs? |

| Parameter | <X> | Channel | <NR3> | Offset level |
|-----------|-----|---------|-------|-------------------------------------|
| | 1/2 | CH1/2 | ±0.5 | -0.5V ~ +0.5V (2mV/div~50mV/div) |

| | | | | |
|--|--|-----------|------------|---------------------------------------------|
| | | ± 5.0 | ± 50.0 | $-5.0V \sim +5.0V$ (100mV/div~500mV/div) |
| | | | | $-50.0V \sim +50.0V$ (1V/div ~ 5V/div) |

Example `:channel1:scale 1.00e-2` Sets the Channel 1 scale to 10mV/div
`:channel1:offset 2.00e-2` Sets the Channel 1 offset to 20mV

 Set

 Query

:CHANnel<X>:PROBe

Description Sets or returns the probe attenuation factor.
Same as: Channel key → F4

| | | |
|--------|--------------------------------------------------|----------------------------------------------|
| Syntax | < Long > | < Short > |
| | <code>:channel<X>:probe <NR3></code> | <code>:chan<X>:prob <NR1></code> |
| | <code>:channel<X>:probe?</code> | <code>:chan<X>:prob?</code> |

| Parameter | $<X>$ | Channel | $<NR1>$ | Probe attenuation factor |
|-----------|-------|---------|---------|--------------------------|
| | 1/2 | CH1/2 | 0 | 1x |
| | | | 1 | 10x |
| | | | 2 | 100x |

Example `:channel1:probe 1` Sets the Channel 1 probe attenuation factor to 10x

 Set

 Query

:CHANnel<X>:SCALe

Description Sets or returns the vertical scale. The scale depends on the probe attenuation factor.
Same as: Volts/Div knob

| | | |
|--------|--------------------------------------------------|----------------------------------------------|
| Syntax | < Long > | < Short > |
| | <code>:channel<X>:scale <NR3></code> | <code>:chan<X>:scal <NR3></code> |
| | <code>:channel<X>:scale?</code> | <code>:chan<X>:scal?</code> |

| Parameter | <X> | Channel | <NR3> | Vertical scale |
|-----------|-------|---------|-------------|------------------------------|
| 1/2 | CH1/2 | | 2e-3 ~ 5e+0 | 2mV ~ 5V (Probe x1) |
| | | | 2e-2 ~ 5e+1 | 20mV ~ 50V (Probe x10) |
| | | | 2e-1 ~ 5e+2 | 200mV ~ 500V (Probe x100) |

Example :channel1:probe 0 Sets the Channel 1 probe attenuation factor to x1
 :channel1:scale 2.00e-3 Sets the Channel 1 vertical scale to 2mV/div

Cursor Command

| | |
|----------------------------|----|
| :CURSor:X<X>Position | 23 |
| :CURSor:Y<X>Position | 24 |
| :CURSor:<X>DELta | 24 |
| :CURSor:<X>DISplay | 25 |
| :CURSor:SOURce | 26 |

:CURSor:X<X>Position

| | |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Description | Sets or returns the horizontal (X axis) cursor position. Same as: Cursor key → F5 (X-Y) → F2 (X1) or F3 (X2) + Variable knob |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------|

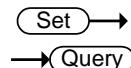

| Syntax | < Long > | < Short > |
|--------|----------------------------|-------------------|
| | :cursor:x<X>position <NR1> | :curs:x<X>p <NR1> |
| | :cursor:x<X>position? | :curs:x<X>p? |

| Parameter | <X> | Cursor 1 or 2 | <NR1> | Cursor position |
|-----------|-----|---------------|---------|-----------------|
| | 1 | Cursor X1 | 1 ~ 249 | 1 ~ 249 point |
| | 2 | Cursor X2 | | |

| | |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Note | When in the query mode, the returned data format is <NR3> as follows. CH1, CH2, Math (CH1±CH2): time (s) Math (FFT): frequency (Hz) |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------|

| | | |
|---------|-----------------------------------------------------------------------------|---------------------------------------------------------------|
| Example | :cursor:xdisplay 1 :cursor:x1position 100 | Puts the horizontal cursor X1 on the 100 point position |
| | :channel:math 3 :cursor:xdisplay 1 :cursor:x1position? → 2.500E+03 | Returns the X1 cursor position as 2500Hz in the Math FFT mode |

:CURSOR:Y<X>Position

| | |
|-------------|----------------------------------------------------------------------|
| Description | Selects or returns the vertical (Y axis) cursor position. |
| | Same as: Cursor key → F5 (X-Y) → F2(Y1) or F3(Y2) + Vertical knob |

| | | |
|--------|----------------------------|-------------------|
| Syntax | < Long > | < Short > |
| | :cursor:y<X>position <NR1> | :curs:y<X>p <NR1> |
| | :cursor:y<X>position? | :curs:y<X>p? |

| | | | | |
|-----------|-----|---------------|---------|-----------------|
| Parameter | <X> | Cursor 1 or 2 | <NR1> | Cursor position |
| | 1 | Cursor Y1 | 1 ~ 199 | 1 ~ 199 point |
| | 2 | Cursor Y2 | | |

| | |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Note | When in the query mode, the returned data format is <NR3> as follows. CH1, CH2, Math (CH1±CH2): voltage (V) Math (FFT): decibel (dB) |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------|

| | | |
|---------|------------------------|--------------------------------------------------------------|
| Example | :cursor:ydisplay 1 | Puts the vertical cursor Y1 on the 100 point position |
| | :cursor:y1position 100 | |
| | :channel:math 3 | Returns the Y1 cursor position as 2.5dB in the Math FFT mode |
| | :cursor:ydisplay 1 | |
| | :cursor:y1position? | |
| | → 2.500E+00 | |

CURSOR:<X>DELta

| | |
|-------------|------------------------------------------------------------------------------------|
| Description | Returns the distance between two horizontal (X axis) or vertical (Y axis) cursors. |
| | Same as: Cursor key → F5 (X-Y) → F4 |

| | | |
|--------|-------------------|---------------|
| Syntax | < Long > | < Short > |
| | :cursor:<X>delta? | :curs:<X>del? |

| | | |
|-----------|-------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|
| Parameter | <X> | Horizontal or vertical cursor |
| | x | Horizontal cursor (X axis) |
| | y | Vertical cursor (Y axis) |
| Note | The returned data format is <NR3> as follows. | |
| | CH1, CH2, Math (CH1±CH2): time (s) for horizontal cursor, voltage (V) for vertical cursor | |
| | Math (FFT): frequency (Hz) for horizontal cursor, decibel (dB) for vertical cursor | |
| Example | :channel:math 3 :cursor:xdisplay 1 :cursor:xdelta? → 2.500E+03 | Returns the frequency (2500Hz) between the two horizontal cursors in the Math FFT mode |
| | :channel:math 3 :cursor:ydisplay 1 :cursor:ydelta? → 2.500E+00 | Returns the decibel (2.5dB) between the two vertical cursors in the Math FFT mode |

:CURSor:<X>DISplay

Description Turns the horizontal or vertical cursors on/off.

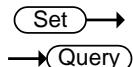

Same as: Cursor key

Syntax < Long > < Short >

:cursor:y<X>display <Boolean> : curs:y<X>dis
<Boolean>

| | | | | |
|-----------|-----|----------------|-------|---------------|
| Parameter | <X> | X or Y cursor | <NR1> | Cursor on/off |
| | x | X (horizontal) | 0 | off |
| | y | Y (vertical) | 1 | on |

Example :cursor:ydisplay 1 Turn Y cursor on

:CURSor:SOURce

Description Selects or returns the cursor source channel.

Same as: Cursor key → F1 (Source)

Syntax < Long > < Short >

:cursor:source <NR1> :curs:sour <NR1>

:cursor:source? :curs:sour?

Parameter <NR1> Cursor source channel

1/2 Channel ½

3 Math result

Example :cursor:source 2 Selects Channel 2 as
 the cursor source

Display Command

| | |
|---------------------------|----|
| :DISPlay:ACCumulate | 27 |
| :DISPlay:CONTrast | 27 |
| :DISPlay:GRATicule | 28 |
| :DISPlay:WAVeform | 28 |
| :REFResh | 29 |

:DISPlay:ACCumulate

Description Turns the display accumulate mode on/off or returns its status.

Same as: Display key → F2

| | | |
|--------|-------------------------------|---------------------|
| Syntax | < Long > | < Short > |
| | :display:accumulate <Boolean> | :disp:acc <Boolean> |
| | :display:accumulate? | :disp:acc? |

| | | |
|-----------|-------|----------------------|
| Parameter | <NR1> | Display accumulation |
| | 0 | off |
| | 1 | on |

Example :display:accumulate 1 Turns on the accumulation

:DISPlay:CONTrast

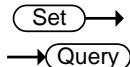

Description Sets or returns the display contrast level.

Same as: Display key → F4

| | | |
|--------|-------------------------|------------------|
| Syntax | < Long > | < Short > |
| | :display:contrast <NR1> | :disp:cont <NR1> |
| | :display:contrast? | :disp:cont? |

| | | |
|-----------|-------|----------------------------------------------------------------|
| Parameter | <NR1> | Display contrast -10 ~ 10 Lowest (-10) to the Highest (+10) |
|-----------|-------|----------------------------------------------------------------|

| | | |
|---------|---------------------|-----------------------------------------------------|
| Example | :display:contrast 0 | Sets the display contrast to the middle (± 0) |
|---------|---------------------|-----------------------------------------------------|

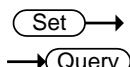

:DISPlay:GRATicule

| | |
|-------------|---------------------------------------------------------------------|
| Description | Sets or returns the display grid type. Same as: Display key → F5 |
|-------------|---------------------------------------------------------------------|

| | | |
|--------|-------------------------------------------------------------|----------------------------------------------|
| Syntax | < Long > :display:graticule <NR1> :display:graticule? | < Short > :disp:grat <NR1> :disp:grat? |
|--------|-------------------------------------------------------------|----------------------------------------------|

| | | | | |
|-----------|-------|------------|-------|------------|
| Parameter | <NR1> | Grid type | <NR1> | Grid type |
| | 0 | Full mode | 2 | Frame mode |
| | 1 | Cross mode | | |

| | | |
|---------|----------------------|-----------------------|
| Example | :display:graticule 0 | Selects the full grid |
|---------|----------------------|-----------------------|

:DISPlay:WAVeform

| | |
|-------------|-------------------------------------------------------------------------|
| Description | Sets or returns the display waveform type. Same as: Display key → F1 |
|-------------|-------------------------------------------------------------------------|

| | | |
|--------|-----------------------------------------------------------|--------------------------------------------|
| Syntax | < Long > :display:waveform <NR1> :display:waveform? | < Short > :disp:wav <NR1> :disp:wav? |
|--------|-----------------------------------------------------------|--------------------------------------------|

| | | |
|-----------|-------|-----------------------|
| Parameter | <NR1> | Display waveform type |
| | 0 | Vectors |
| | 1 | Dots |

| | | |
|---------|---------------------|------------------------------|
| Example | :display:waveform 0 | Selects the vectors waveform |
|---------|---------------------|------------------------------|

:REFResh**Set** →

Description Erases the existing waveform and draws a new one.

Same as: Display key → F3

Syntax < Long > < Short >
 :refresh :refr

Measure command

| | |
|---------------------------|----|
| :MEASure:FALL..... | 30 |
| :MEASure:FOVShoot..... | 31 |
| :MEASure:FPReShoot | 31 |

| :MEASure:VRMS..... | 38 |

:MEASure:FALL

→ (Query)

| | | |
|-------------|-------------------------------------------------------------------------------------------|--------------------------------------------|
| Description | Returns the falltime measurement result. Same as: Measure key → F1~F5 → F3 (Fall Time) | |
| Syntax | < Long > | < Short > :measure:fall? :meas:fall? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |

| | | |
|---------|-------------------------------------|-----------------------------------------------------|
| Example | :measure:source 1 :measure:fall? | Selects Channel 1, and then measures the fall time. |
|---------|-------------------------------------|-----------------------------------------------------|

:MEASure:FOVShoot Query

| | | |
|-------------|---------------------------------------------------------------------------------------|----------------------------------------------------------|
| Description | Returns the fall overshoot amplitude. Same as: Measure key → F1~F5 → F3 (FOVShoot) | |
| Syntax | < Long > | < Short > |
| | :measure:fovshoot? | :meas:fovs? |
| Returns | <NR2> with % sign | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:fall? | Selects Channel 1, and then measures the fall overshoot. |

:MEASure:FPReShoot Query

| | | |
|-------------|-----------------------------------------------------------------------------------|---------------------------------------------------------|
| Description | Returns fall preshoot amplitude. Same as: Measure key → F1~F5 → F3 (FPREShoot) | |
| Syntax | < Long > | < Short > |
| | :measure:fovshoot? | :meas:fovs? |
| Returns | <NR2> with % sign | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:fall? | Selects Channel 1, and then measures the fall preshoot. |

:MEASure:FREQuency

→(Query)

| | | |
|-------------|-----------------------------------------------------------------------------------|-----------------------------------------------------|
| Description | Returns the frequency value. Same as: Measure key → F1~F5 → F3 (Frequency) | |
| Syntax | < Long > | < Short > |
| | :measure:frequency? | :meas:freq? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:frequency? | Selects Channel 1, and then measures the frequency. |

:MEASure:NWIDth

→(Query)

| | | |
|-------------|----------------------------------------------------------------------------------------------|----------------------------------------------------------------|
| Description | Returns the first negative pulse width timing. Same as: Measure key → F1~F5 → F3 (-Width) | |
| Syntax | < Long > | < Short > |
| | :measure:nwidth? | :meas:nwid? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:nwidth? | Selects Channel 1, and then measures the negative pulse width. |

:MEASure:PDUTy

→(Query)

| | | |
|-------------|-----------------------------------------------------------------------------------------|-----------|
| Description | Returns the positive duty cycle ratio. Same as: Measure key → F1~F5 → F3 (DutyCycle) | |
| Syntax | < Long > | < Short > |

| | | |
|---------|-----------------------------------------------------------------------------------|---------------------------------------------------------------|
| | :measure:pduy? | :meas:pdu? |
| Returns | <NR2> as the percentage | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:pduy? | Selects Channel 1, and then measures the positive duty cycle. |

:MEASure:PERiod

→(Query)

| | | |
|-------------|-----------------------------------------------------------------------------------|--------------------------------------------------|
| Description | Returns the period. Same as: Measure key → F1~F5 → F3 (Period) | |
| Syntax | < Long > | < Short > :measure:period? :meas:per? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:period? | Selects Channel 1, and then measures the period. |

:MEASure:PWIDth

→(Query)

| | | |
|-------------|---------------------------------------------------------------------------------------|---------------------------------------------|
| Description | Returns the first positive pulse width. Same as: Measure key → F1~F5 → F3 (+Width) | |
| Syntax | < Long > | < Short > :measure:period? :meas:per? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |

| | | |
|---------|---------------------------------------|----------------------------------------------------------------|
| Example | :measure:source 1 :measure:pwidth? | Selects Channel 1, and then measures the positive pulse width. |
|---------|---------------------------------------|----------------------------------------------------------------|

:MEASure:RISe Query

| | |
|-------------|---------------------------------------------------------------------------------------------|
| Description | Returns the first pulse rising edge timing. Same as: Measure key → F1~F5 → F3 (RiseTime) |
|-------------|---------------------------------------------------------------------------------------------|

| | | |
|--------|----------------------------|-------------------------|
| Syntax | < Long > :measure:rise? | < Short > :meas:ris? |
|--------|----------------------------|-------------------------|

| | |
|---------|-------|
| Returns | <NR3> |
|---------|-------|

| | |
|------|-----------------------------------------------------------------------------------|
| Note | Before using this command, select the measurement channel. See the example below. |
|------|-----------------------------------------------------------------------------------|

| | | |
|---------|-------------------------------------|--------------------------------------------------------------|
| Example | :measure:source 1 :measure:rise? | Selects Channel 1, and then measures the rising edge timing. |
|---------|-------------------------------------|--------------------------------------------------------------|

:MEASure:ROVShoot Query

| | |
|-------------|-------------------------------------------------------------------------------------------------|
| Description | Returns rise overshoot amplitude in percentage. Same as: Measure key → F1~F5 → F3 (ROVShoot) |
|-------------|-------------------------------------------------------------------------------------------------|

| | | |
|--------|--------------------------------|--------------------------|
| Syntax | < Long > :measure:rovshoot? | < Short > :meas:rovs? |
|--------|--------------------------------|--------------------------|

| | |
|---------|-------------------|
| Returns | <NR2> with % sign |
|---------|-------------------|

| | |
|------|-----------------------------------------------------------------------------------|
| Note | Before using this command, select the measurement channel. See the example below. |
|------|-----------------------------------------------------------------------------------|

| | | |
|---------|-----------------------------------------|----------------------------------------------------------|
| Example | :measure:source 1 :measure:rovshoot? | Selects Channel 1, and then measures the rise overshoot. |
|---------|-----------------------------------------|----------------------------------------------------------|

:MEASure:RPReShoot→ **Query**

| | | |
|-------------|--------------------------------------------------------------------------------------------------|---------------------------------------------------------|
| Description | Returns rise overshoot amplitude in percentage. Same as: Measure key → F1~F5 → F3 (RPReShoot) | |
| Syntax | < Long > | < Short > |
| | :measure:rpreshoot? | :meas:rpr? |
| Returns | <NR2> with % sign | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:rpreshoot? | Selects Channel 1, and then measures the rise preshoot. |

→ **Set****:MEASure:SOURce**→ **Query**

| | | |
|-------------|---------------------------------------------------------------------------|------------------|
| Description | Selects the measurement channel. Same as: Measure key → F1~F5 → F1, F2 | |
| Syntax | < Long > | < Short > |
| | :measure:source <NR1> | :meas:sour <NR1> |
| | :measure:source? | :meas:sour? |
| Parameter | <NR1> 1 ~ 2 | Channel1 ~ 2 |
| Example | :measure:source 1 :measure:rprshoot? | |
| | Selects Channel 1, and then measures the rise preshoot. | |

:MEASure:VAMPplitude→ **Query**

| | |
|-------------|----------------------------------------------------------------------------------------------------------------|
| Description | Returns the voltage difference between positive and negative peak. Same as: Measure key → F1~F5 → F3 (Vamp) |
|-------------|----------------------------------------------------------------------------------------------------------------|

| | | |
|---------|-----------------------------------------------------------------------------------|------------------------------------------------------------------|
| Syntax | < Long > :measure:vamplitude? | < Short > :meas:vamp? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:vamplitude? | Selects Channel 1, and then measures the rise Voltage amplitude. |

:MEASure:VAverage

→(Query)

| | | |
|-------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------|
| Description | Returns the average voltage. Same as: Measure key → F1~F5 → F3 (Vavg) | |
| Syntax | < Long > :measure:vaverage? | < Short > :meas:vavg? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:vaverage? | Selects Channel 1, and then measures the average Voltage. |

:MEASure:VHI

→(Query)

| | | |
|-------------|-----------------------------------------------------------------------------------|-------------------------|
| Description | Returns the global high voltage. Same as: Measure key → F1~F5 → F3 (Vhi) | |
| Syntax | < Long > :measure:vhi? | < Short > :meas:vhi? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |

| | | |
|---------|------------------------------------|---------------------------------------------------------------|
| Example | :measure:source 1 :measure:vhi? | Selects Channel 1, and then measures the global high Voltage. |
|---------|------------------------------------|---------------------------------------------------------------|

:MEASure:VLO
 Query

| | | |
|-------------|-----------------------------------------------------------------------------------|--------------------------------------------------------------|
| Description | Returns the global low voltage. Same as: Measure key → F1~F5 → F3 (Vlo) | |
| Syntax | < Long > | < Short > |
| | :measure:vlo? | :meas:vlo? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:vlo? | Selects Channel 1, and then measures the global low Voltage. |

:MEASure:VMAX
 Query

| | | |
|-------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------|
| Description | Returns the maximum amplitude. Same as: Measure key → F1~F5 → F3 (Vmax) | |
| Syntax | < Long > | < Short > |
| | :measure:vmax? | :meas:vmax? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:vmax? | Selects Channel 1, and then measures the maximum amplitude. |

:MEASure:VMIN

| | | |
|-------------|-----------------------------------------------------------------------------------|-------------------------------------------------------------|
| Description | Returns the minimum amplitude. Same as: Measure key → F1~F5 → F3 (Vmin) | |
| Syntax | < Long > :measure:vmin? | < Short > :meas:vmin? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:vmin? | Selects Channel 1, and then measures the minimum amplitude. |

:MEASure:VPP

| | | |
|-------------|----------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| Description | Returns the peak-to-peak amplitude (difference between maximum and minimum amplitude) Same as: Measure key → F1~F5 → F3 (Vpp) | |
| Syntax | < Long > :measure:vpp? | < Short > :meas:vpp? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:vpp? | Selects Channel 1, and then measures the peak-to-peak amplitude. |

:MEASure:VRMS

| | | |
|-------------|-----------------------------------------------------------------------------------|--|
| Description | Returns the root-mean-square voltage. Same as: Measure key → F1~F5 → F3 (Vrms) | |
|-------------|-----------------------------------------------------------------------------------|--|

| | | |
|---------|-----------------------------------------------------------------------------------|--------------------------------------------------------------------|
| Syntax | < Long > :measure:vrms? | < Short > :meas:vrms? |
| Returns | <NR3> | |
| Note | Before using this command, select the measurement channel. See the example below. | |
| Example | :measure:source 1 :measure:vrms? | Selects Channel 1, and then measures the root mean square voltage. |

Go No-Go Commands

| | |
|------------------------------|----|
| :GONogo:CLEar..... | 40 |
| :GONogo:EXECute | 41 |
| :GONogo:FUNCTION..... | 41 |
| :GONogo:NGCount? | 42 |
| :GONogo:NGDefine..... | 42 |
| :GONogo:SOURce | 42 |
| :GONogo:VIOLation | 43 |
| :TEMPlate:MODE | 43 |
| :TEMPlate:MAX | 44 |
| :TEMPlate:MIN | 45 |
| :TEMPlate:POSITION:MAX..... | 45 |
| :TEMPlate:POSITION:MIN | 46 |
| :TEMPlate:SAVE:MAXimum | 47 |
| :TEMPlate:SAVE:MINimum | 48 |
| :TEMPlate:TOLERance..... | 48 |
| :TEMPlate:SAVE:AUTo | 49 |

:GONogo:CLEar

| | |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | Clears the Go No-Go test result ratio. This is the equivalent to clearing the “failed” to “total tests” result ratio as shown in the Go-NoGo menu. |
| | Same as: Utility key → More (F5) → Go-NoGo Menu(F1)→Ratio:(F5). |

| | |
|------|-------------------------------------------------------------------------------------------------------------------------|
| Note | Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope. |
|------|-------------------------------------------------------------------------------------------------------------------------|

| | | |
|--------|---------------|-----------|
| Syntax | < Long > | < Short > |
| | :GONogo:CLEar | :GON:CLE |

:GONogo:EXECute**Set** →→ **Query**

| | | |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| Description | Starts or stops the Go-NoGo testing. Same as: Utility key → More (F5) → Go-NoGo Menu(F1) → Go-NoGo(F4). | |
| Note | Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope. | |
| Syntax | < Long > | < Short > |
| | :GONogo:EXECute {0 1} | :GON:EXEC {0 1} |
| | :GONogo:EXECute? | :GON:EXEC ? |
| Parameter/ Return parameter | 0 | Off. Stop Go-NoGo testing. |
| | 1 | On. Start Go-NoGo testing. |
| Example | :GON:EXEC 0 | Turn Go-NoGo off. |
| :GONogo:FUNCTION | | |
| | | Set → |
| | | → Query |
| Description | Initializes the oscilloscope for the Go-NoGo mode. This command must be used to initialize the oscilloscope for Go-NoGo mode before any Go- NoGo commands can be executed. To exit from Go-NoGo mode, use this function to un-initialize Go-NoGo mode. | |
| Syntax | < Long > | < Short > |
| | :GONogo:FUNCTION {0 1} | :GON:FUNC {0 1} |
| | :GONogo:FUNCTION? | :GON:FUNC ? |
| Parameter/ Return parameter | 0 | Un-initialize the oscilloscope from Go- NoGo mode. |
| | 1 | Initialize the oscilloscope for Go-NoGo mode. |
| Example | :GON:FUNC 1 | Initialize the scope. |

:GONogo:NGCount?

| | | |
|-------------|------------------------------------------------------------------|--|
| Description | Returns the test result count ratio (failed count, total count). | |
|-------------|------------------------------------------------------------------|--|

| | | |
|--------|-----------|-----------|
| Syntax | < Long > | < Short > |
| | :GON:NGC? | :GON:NGC? |

| | |
|------------------|-------------------------------------------|
| Return parameter | <NR1>, <NR1> <failed count>,<total count> |
|------------------|-------------------------------------------|

| | | |
|---------|---------------------|---------------------------------|
| Example | :GON:NGC? >2,128 | 2 fails from 128 Go-NoGo tests. |
|---------|---------------------|---------------------------------|

:GONogo:NGDefine

| | | |
|-------------|-----------------------------------------------------------|--|
| Description | Sets or queries the Go-NoGo boundary template conditions. | |
|-------------|-----------------------------------------------------------|--|

| | | |
|------|-------------------------------------------------------------------------------------------------------------------|--|
| Note | Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope. | |
|------|-------------------------------------------------------------------------------------------------------------------|--|

| | | |
|--------|------------------------|----------------|
| Syntax | < Long > | < Short > |
| | :GONogo:NGDefine {0 1} | :GON:NGD {0 1} |
| | :GONogo:NGDefine? | :GON:NGD |

| | | |
|--------------------------------|---|---------------------------------------------------------------|
| Parameter/ Return parameter | 0 | No-Go when the waveform doesn't exceed the boundary template. |
| | 1 | No-Go when the waveform exceeds the boundary template. |

| | | |
|---------|------------|-----------------------------------------------|
| Example | :GON:NGD 1 | NoGo conditions set to when outside template. |
|---------|------------|-----------------------------------------------|

:GONogo:SOURCe

| | | |
|-------------|----------------------------------|--|
| Description | Sets the Go-NoGo channel source. | |
|-------------|----------------------------------|--|

Note Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.

| | | |
|---------------|----------------------|-----------------|
| Syntax | < Long > | < Short > |
| | :GONogo:SOURce {1 2} | :GON:SOUR {1 2} |
| | :GONogo:SOURce? | :GON:SOUR? |

| | | |
|-------------------------|---|------------------------------|
| Parameter/ | 1 | Sets the source to channel 1 |
| Return parameter | 2 | Sets the source to channel 2 |

| | | |
|----------------|-------------|-------------------------------|
| Example | :GON:SOUR 1 | Sets the source to channel 1. |
|----------------|-------------|-------------------------------|

(Set) →

→ (Query)

| | |
|--------------------|---------------------------------------------------|
| Description | Sets or queries the Go-NoGo violation conditions. |
|--------------------|---------------------------------------------------|

Note Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.

| | | |
|---------------|-------------------------|-----------------|
| Syntax | < Long > | < Short > |
| | :GONogo:VIOLation {0 1} | :GON:VIOL {0 1} |
| | :GONogo:VIOLation? | :GON:VIOL? |

| | | |
|-------------------------|---|----------------------------------|
| Parameter/ | 0 | Violation condition = "Continue" |
| Return parameter | 1 | Violation condition = "Stop" |

| | | |
|----------------|-------------|---------------------------------------------|
| Example | :GON:VIOL 1 | Sets the violation condition to "Continue". |
|----------------|-------------|---------------------------------------------|

(Set) →

→ (Query)

| | |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | Sets or queries the Go-NoGo template mode. When Auto mode is selected, CH1 or CH2 are used as the template source. When Normal mode is selected, the template source can be selected from internal memory (W1~W15, RefA or RefB). |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| | | |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|
| Note | Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope. | |
| Syntax | < Long > | < Short > |
| | :TEMPlate:MODE {0 1} | :TEMP:MOD {0 1} |
| | :TEMPlate:MODE? | :TEMP:MOD? |
| Parameter/ Return parameter | 0 1 | Select Normal template mode. Select Auto template mode. |
| Example | :TEMP :MOD 1 | Set to Auto mode. |
| | | → (Set) → → (Query) |
| Description | Sets or queries the template used for the MAX boundary (W1~W15, RefA). | |
| Note | <p>A template can only be defined for the MAX or MIN template, not both.</p> <p>Before this command can be used, please set the template mode to normal using the :TEMPlate:MODE 0 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |
| Syntax | < Long > | < Short > |
| | :TEMPlate:MAX <NR1> | :TEMP:MAX <NR1> |
| | :TEMPlate:MAX? | :TEMP:MAX? |
| Parameter/ Return parameter | 0 1~15 | Set RefA as the MAX template. Set W1 ~ W15 as the MAX template |
| Example | :TEMP :MAX ? >1 | RefA is the template. |

:TEMPlate:MIN Set Query

| | | |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| Description | Sets or queries the template used for the MIN boundary (W1~W15, RefB). | |
| Note | <p>A template can only be defined for the MAX or MIN template, not both.</p> <p>Before this command can be used, please set the template mode to normal using the :TEMPlate:MODE 0 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |
| Syntax | < Long > | < Short > |
| | :TEMPlate:MIN <NR1> | :TEMP:MIN <NR1> |
| | :TEMPlate:MIN? | :TEMP:MIN? |
| Parameter/ Return parameter | 0 | Set RefB as the MIN template. |
| | 1~15 | Set W1 ~ W15 as the MIN template |
| Example | :TEMP :MIN ? >1 | RefB is the template. |

:TEMPlate:POSIon:MAX Set Query

| | |
|-------------|-------------------------------------------------------------------------------------------------------------|
| Description | Sets and queries the position of the MAX template in grid divisions. 1 grid division = 25 on-screen pixels. |
|-------------|-------------------------------------------------------------------------------------------------------------|

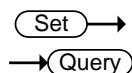

| | | |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Note | <p>This command will not alter the position of the waveform (RefA, W1~15) in memory, unless the template is saved with the :TEMPlate:SAVe :MAXimum command.</p> <p>Before this command can be used, please set the template mode to normal using the :TEMPlate:MODe 0 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |
|------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|

| | | |
|--------|-------------------------------|------------------------|
| Syntax | < Long > | < Short > |
| | :TEMPlate:POSIon:MAX <NR2> | :TEMP:POS:MAX <NR2> |
| | :TEMP:POS:MAX? | :TEMP:POS:MAX? |

| | | |
|--------------------------------|-------|-------------------------------------------------------|
| Parameter/ Return parameter | <NR2> | -12.00 ~ 12.00 Div. 0 represents the center division. |
|--------------------------------|-------|-------------------------------------------------------|

| | | |
|---------|--------------------|-----------------------------------------------------------------------------------|
| Example | :TEMP:POS:MAX 2.00 | Sets the template to the 2 nd grid division above the center division. |
|---------|--------------------|-----------------------------------------------------------------------------------|

:TEMPlate:POSIon:MIN

| | |
|-------------|-------------------------------------------------------------------------------------------------------------|
| Description | Sets and queries the position of the MIN template in grid divisions. 1 grid division = 25 on-screen pixels. |
|-------------|-------------------------------------------------------------------------------------------------------------|

| | | |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Note | <p>This command will not alter the position of the waveform (RefA, W1~15) in memory, unless the template is saved with the :TEMPlate:SAVe :MINimum command.</p> <p>Before this command can be used, please set the template mode to normal using the :TEMPlate:MODE 0 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |
| Syntax | < Long > | < Short > |
| | :TEMPlate:POSITION:MIN <NR2> | :TEMP:POS:MIN <NR2> |
| | :TEMP:POS:MIN? | :TEMP:POS:MIN? |
| Parameter/ Return parameter | <NR2> | -12.00 ~ 12.00 Div. 0 represents the center division. |
| Example | :TEMP:POS:MIN 2.00 | Sets the template to the 2 nd grid division above the center division. |

:TEMPlate:SAVe:MAXimum

| | | |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Description | Saves the maximum template. Same as: Utility key → More (F5) → Go-NoGo Menu(F1)→Template Edit(F1)→Save & Create(F4). | |
| Note | <p>Before this command can be used, please set the template mode to normal using the :TEMPlate:MODE 0 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |
| Syntax | < Long > | < Short > |
| | :TEMPlate:SAVe:MINimum | :TEMP:SAV:MIN |

:TEMPlate:SAVe:MINimum
 →

| | | |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Description | Saves the minimum template. Same as: Utility key → More (F5) → Go-NoGo Menu(F1)→Template Edit(F1)→Save & Create(F4). | |
| Note | <p>Before this command can be used, please set the template mode to normal using the :TEMPlate:MODe 0 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |

| | | |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Syntax | < Long > | < Short > |
| | :TEMPlate:SAVe:MINimum | :TEMP:SAV:MIN |
| :TEMPlate:TOlerance |  →  | |

| | | |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Description | Sets or queries the tolerance (as a percentage) of the auto template. | |
| Note | <p>Before this command can be used, please set the template mode to auto using the :TEMPlate:MODe 1 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |

| | | |
|--------|---------------------------|-----------------|
| Syntax | < Long > | < Short > |
| | :TEMPlate:TOlerance <NR2> | :TEMP:TOL <NR2> |
| | :TEMPlate:TOlerance? | :TEMP:TOL? |

| | | |
|--------------------------------|------------------------------|--|
| Parameter/ Return parameter | <NR2> 4.0 ~ 40 (0.4% ~ 40%). | |
|--------------------------------|------------------------------|--|

| | | |
|---------|--------------|----------------------------|
| Example | :TEMP:TOL 10 | Sets the tolerance to 10%. |
|---------|--------------|----------------------------|

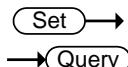

:TEMPlate:SAVe:AUTo**Set** →

| | | |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| Description | Saves the auto template. Same as: Utility key → More (F5) → Go-NoGo Menu(F1)→Template Edit(F1)→Save & Create(F4). | |
| Note | <p>Before this command can be used, please set the template mode to auto using the :TEMPlate:MODe 1 command.</p> <p>Before any Go-NoGo command can be used, please use the :GONogo:FUNCTION 1 command to initialize the oscilloscope.</p> | |
| Syntax | < Long > :TEMPlate:SAVe:AUTo | < Short > :TEMP:SAV:AUT |

Data Log Commands

| | |
|-------------------------|----|
| :DATALOG:STATE | 50 |
| :DATALOG:SOURce | 50 |
| :DATALOG:SAVe | 51 |
| :DATALOG:INTerval | 51 |
| :DATALOG:DURation | 51 |

:DATALOG:STATE

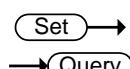

Description Turns the datalogging function on/off.
Same as: Utility key → More (F5) → Data Logging
Menu(F3)→Data Logging (F1).

Syntax < Long > < Short >
 :DATALOG:STATE {0|1} :DATALOG:STATE
 :DATALOG:STATE? {0|1}
 :DATALOG:STATE?

Parameter/ 0 Off. Stop data logging function.
Return parameter 1 On. Start data logging function.

Example :DATALOG:STATE 1 Turn data logging on.

:DATALOG:SOURce

Description Sets or queries the data logging source channel.

Syntax < Long > < Short >
 :DATALOG:SOURce{1|2} :DATALOG:SOUR{1|2}
 :DATALOG:SOURce? :DATALOG:SOUR?

Parameter/ 1 Sets CH1 as the source channel
Return parameter 2 Sets CH2 as the source channel

Example :DATALOG:SOUR 1 Set source as CH1.

:DATALOG:SAVE**Set****Query**

| | | |
|--------------------------------|-----------------------------------------------------------|----------------------------------------------------------------------------------------|
| Description | Sets the save type as waveform or image. | |
| Syntax | < Long > | < Short > |
| | :DATALOG:SAVe {0 1} | :DATALOG:SAV {0 1} |
| | :DATALOG:SAVe? | :DATALOG:SAV? |
| Parameter/ Return parameter | 0 1 | Save as image Save as waveform |
| Example | :DATALOG:SAVe 1 | Set the save type to waveform. |
| :DATALOG:INTerval | | Set |
| | | Query |
| Description | Sets or queries the interval time between each recording. | |
| Syntax | < Long > | < Short > |
| | :DATALOG:INTerval <NR1> | :DATALOG:INT <NR1> |
| | :DATALOG:INTerval? | :DATALOG:INT? |
| Parameter/ Return parameter | <NR1> | Discrete time intervals in seconds: {2 3 4 5 10 20 30 60 120 300 600 1 200 1800} |
| Example | :DATALOG:INT 2 | Sets the interval time to 2 seconds. |
| :DATALOG:DURation | | Set |
| | | Query |
| Description | Sets or queries the duration time of each recording. | |
| Syntax | < Long > | < Short > |

:DATALOG:DURation <NR1> :DATALOG:DUR
:DATALOG:DURation? <NR1>
:DATALOG:DUR?

| | | |
|--------------------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Parameter/ Return parameter | <NR1> | Discrete recording time in minutes: {5 10 15 20 25 30 60 90 120 150 180 210 240 270 300 330 360 390 420 45 0 480 510 540 570 600 1200 1800 240 0 3000 3600 4200 4800 5400 6000} |
|--------------------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Example :DATALOG:DUR 5 Sets the recording time to 5 minutes.

Save/Recall Command

| | |
|----------------------------------|----|
| :MEMORY<X>:RECall:SETup | 53 |
| :MEMORY<X>:RECall:WAVeform | 53 |
| :MEMORY<X>:SAVe:SETup | 54 |
| :MEMORY<X>:SAVe:WAVeform | 54 |
| *RCL..... | 55 |
| :REF<X>:DISPlay..... | 55 |
| :REF<X>:LOCate | 56 |
| :REF<X>:SAVe..... | 56 |
| *SAV..... | 57 |

:MEMORY<X>:RECall:SETup

| | | |
|-------------|---------------------------------------------------------------------------------------------|--------------------------------------------------|
| Description | Recalls a panel setting from the internal memory. Same as: Save/Recall key (recall) → F3 | |
| Syntax | < Long > | < Short > |
| | :memory<x>:recall:setup | :mem<x>:rec:set |
| Parameter | <X> Internal memory 1 ~ 15 S1 ~ S15 | |
| Example | :memory1:recall:setup | Recalls the settings from the internal memory S1 |

:MEMORY<X>:RECall:WAVeform

| | | |
|-------------|-----------------------------------------------------------------------------------------------------------------------------|-----------------------|
| Description | Recalls a waveform from the internal memory and saves it to a reference waveform. Same as: Save/Recall key (recall) → F4 | |
| Syntax | < Long > | < Short > |
| | :memory<x>:recall:waveform <NR1> | :mem<x>:rec:wav <NR1> |
| Parameter | <X> Internal memory | |

1 ~ 15 W1 ~ W15

<NR1> Reference waveform

1, 2 RefA, RefB

| | | |
|---------|----------------------------|-----------------------------------------------------------------------------------------|
| Example | :memory1:recall:waveform 1 | Recalls a waveform from the internal memory W1 and saves it to the reference waveform A |
|---------|----------------------------|-----------------------------------------------------------------------------------------|

:MEMory<X>:SAVe:SETup

 →

Description Saves the current panel settings to an internal memory.

Same as: Save/Recall key (save) → F1

Syntax < Long > < Short >

:memory<x>:save:setup :mem<x>:sav:set

Parameter <X> Internal memory

1 ~ 15 S1 ~ S15

| | | |
|---------|---------------------|--------------------------------------------------|
| Example | :memory1:save:setup | Save the current panel settings to the memory S1 |
|---------|---------------------|--------------------------------------------------|

:MEMory<X>:SAVe:WAveform

 →

Description Saves a reference waveform to the internal memory.

Same as: Save/Recall key (save) → F2

Syntax < Long > < Short >

:memory<x>:save:waveform :mem<x>:sav:wav
<NR1> <NR1>

Parameter <X> Internal memory

1 ~ 15 W1 ~ W15

<NR1> Reference waveform

| | | | |
|---|------|---|------|
| 0 | CH1 | 1 | CH2 |
| 2 | Math | 3 | RefA |
| 4 | RefB | | |

Example `:memory1:save:waveform 1` Saves the reference waveform A to the internal memory W1

***RCL**

Description Recalls a set of panel setting from one of the fifteen internal memories, S1 to S15.

Same as: Save/Recall key (recall) → F3

Syntax `*rcl <NR1>`

| | | |
|-----------|--------------------------|-----------|
| Parameter | <code><NR1></code> | Settings |
| | 1 to 15 | S1 to S15 |

Example `*rcl 1` Recalls the panel settings from S1

**:REF<X>:DISPlay**

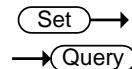

Description Recalls a reference waveform into the display or returns its status.

Same as: Save/Recall key (recall) → F5 → F2 or F3

| | | |
|--------|----------------------------------------------------|------------------------------------------------|
| Syntax | <code>< Long ></code> | <code>< Short ></code> |
| | <code>:ref<x>:display <Boolean></code> | <code>:ref<x>disp <Boolean></code> |
| | <code>:ref<x>:display?</code> | <code>:ref<x>disp?</code> |

| | | | | |
|-----------|------------------------|-----------|------------------------------|------------------|
| Parameter | <code><X></code> | Reference | <code><Boolean></code> | Reference on/off |
| | 1 | A | 0 | off |
| | 2 | B | 1 | on |

Example `:ref1:display 1` Turns on the reference waveform A

:REF<X>:LOCate

Description Moves or returns the position of a reference waveform.

Same as: Save/Recall key → F5 → Variable knob

| Syntax | < Long > | < Short > |
|--------|----------------------|-------------------|
| | :ref<x>:locate <NR1> | :ref<x>:loc <NR1> |
| | :ref<x>:locate? | :ref<x>:loc? |

| Parameter | <X> | Reference | <NR1> | Position |
|-----------|-----|-----------|--------------|----------|
| | 1 | A | -100 to +100 | |
| | 2 | B | | |

Note Before using this command, turn on a reference waveform. See the example below.

| | | |
|----------------|-----------------|--------------------------------------------------------------|
| Example | :ref1:display 1 | Turns on the reference waveform A and move it to ±0 position |
| | :ref1:locate 0 | |

:REF<X>:SAVe

Description Saves an input signal as a reference waveform.

Same as: Save/Recall key (save) → F2 → F2 → F3

| Syntax | < Long > | < Short > |
|--------|--------------------|------------------|
| | :ref<x>:save <NR1> | :ref<x>sav <NR1> |

| Parameter | <X> | Reference | <NR1> | Source |
|-----------|-----|-----------|-------|-----------|
| | 1 | A | 1 | Channel 1 |
| | 2 | B | 2 | Channel 2 |
| | | | 3 | Math |

| | | |
|----------------|--------------|--------------------------------------------------------|
| Example | :ref1:save 1 | Saves the Channel 1 signal as the reference waveform A |
|----------------|--------------|--------------------------------------------------------|

***SAV**

Description Saves the current panel settings into the internal memory.

Same as: Save/Recall key  → F1

Syntax *sav

| | | |
|-----------|---------|-----------------|
| Parameter | <NR1> | Internal memory |
| | 1 to 15 | S1 to S15 |

Example *sav 1 Saves the current panel settings into S1

Time (Horizontal) command

| | |
|------------------------------|----|
| :TIMEbase:DELay..... | 58 |
| :TIMEbase:SCALe | 58 |
| :TIMEbase:SWEep | 59 |
| :TIMEbase:WINDOW:DELay..... | 59 |
| :TIMEbase:WINDOW:SCALe | 60 |

:TIMEbase:DELay  

| | | |
|-------------|---------------------------------------|------------------------------------|
| Description | Sets or returns the horizontal delay. | |
| Syntax | < Long > | < Short > |
| | :timebase:delay <NR3> | :tim:del <NR3> |
| | :timebase:delay? | :tim:del? |
| Example | :timebase:delay 0 | Sets the horizontal delay to 0 sec |

:TIMEbase:SCALe  

| | | |
|-------------|------------------------------------------|-----------|
| Description | Selects or returns the horizontal scale. | |
| | Same as: Time/div knob | |
| Syntax | < Long > | < Short > |

| Parameter | s/div | <NR3> | s/div | <NR3> | s/div | <NR3> |
|-----------|-------|--------------------|-------|--------------------|-------|--------------------|
| | 1ns | 1e ⁻⁹ | 5us | 5e ⁻⁶ | 25ms | 25e ⁻³ |
| | 2.5ns | 2.5e ⁻⁹ | 10us | 10e ⁻⁶ | 50ms | 50e ⁻³ |
| | 5ns | 5e ⁻⁹ | 25us | 25e ⁻⁶ | 100ms | 100e ⁻³ |
| | 10ns | 10e ⁻⁹ | 50us | 50e ⁻⁶ | 250ms | 250e ⁻³ |
| | 25ns | 25e ⁻⁹ | 100us | 100e ⁻⁶ | 500ms | 500e ⁻³ |
| | 50ns | 50e ⁻⁹ | 250us | 250e ⁻⁶ | 1s | 1 |

| | | | | | |
|-------|--------------------|-------|--------------------|------|-----|
| 100ns | 100e ⁻⁹ | 500us | 500e ⁻⁶ | 2.5s | 2.5 |
| 250ns | 250e ⁻⁹ | 1ms | 1e ⁻³ | 5s | 5 |
| 500ns | 500e ⁻⁹ | 2.5ms | 2.5e ⁻³ | 10s | 10 |
| 1us | 1e ⁻⁶ | 5ms | 5e ⁻³ | | |
| 2.5us | 2.5e ⁻⁶ | 10ms | 10e ⁻³ | | |

Example :timetable:scale 1 Selects 1s/div as the horizontal scale

 Set

 Query

Description Selects or returns the horizontal sweep mode.
Same as: Horizontal menu key → F1 ~ F5

Syntax < Long > < Short >
:timebase:sweep <NR1> :tim:swe <NR1>
:timebase:sweep? :tim:swe?

| Parameter | <NR1> | Sweep mode | <NR1> | Sweep mode |
|-----------|-------|---------------|-------|------------|
| | 0 | Main timebase | 1 | Window |
| | 2 | Window zoom | 3 | Roll mode |
| | 4 | XY mode | | |

Example :timetable:sweep 0 Selects the main timebase as the horizontal sweep mode

 Set

 Query

Description Sets or returns the width of the zoomed window.
Same as: Horizontal menu key → F2 (Window) → Time/div knob

Syntax < Long > < Short >
:timebase>window:delay <NR3> :tim:wind:del <NR3>

Example :timetable:window:delay 100 Sets the zoom width
 to 100 points

:TIMEbase:WINDoW:SCALe

Description Sets or returns the scale (length) of the zoomed
 window.

Same as: Horizontal menu key → F3 (zoom)

Syntax < Long > < Short >

:timebase:window:scale <NR3> :tim:wind:scal<NR3>

Example :timetable:window:scale 100 Sets the zoom length
 to 100 points

Trigger command

| | |
|-------------------------------|----|
| :FORCe | 61 |
| :RUN | 62 |
| :SINGle | 62 |
| :STOP | 62 |
| *TRG | 62 |
| :TRIGger:COUPLE | 62 |
| :TRIGger:FREQuency | 63 |
| :TRIGger:LEVel | 63 |
| :TRIGger:MODE | 63 |
| :TRIGger:NREJ | 64 |
| :TRIGger:PULSe:MODE | 65 |
| :TRIGger:PULSe:TIME | 65 |
| :TRIGger:REject | 66 |
| :TRIGger:SLOP | 66 |
| :TRIGger:SOURce | 67 |
| :TRIGger:TYPE | 67 |
| :TRIGger:VIDEO:FIELD | 68 |
| :TRIGger:VIDEO:LINE | 68 |
| :TRIGger:VIDEO:POLarity | 69 |
| :TRIGger:VIDEO:TYPE | 69 |

:FORCe

Description Manually triggers the GDS-1000-U and displays the input signals.

Same as: (Trigger) Force key

| | | |
|--------|---------------|----------------|
| Syntax | <Long format> | <Short format> |
| | :force | :forc |

:RUN**Set** →

Description Starts waiting for a trigger condition.

Same as: Run key

Syntax :run

:SINGle**Set** →

Description Selects the single trigger mode and starts waiting for a trigger condition.

Same as: (Trigger) Single key

Syntax <Long format> <Short format>
:single :singl**:STOP****Set** →

Description Stops waiting for a trigger condition.

Same as: Stop key

Syntax :stop

TRG*Set** →

Description Manually triggers the GDS-1000-U and displays the input signals.

Same as: (Trigger) Force key

Syntax *trg

:TRIGger:COUPLE**Set** →→ **Query**

Description Selects or returns the trigger coupling mode.

Same as: Trigger menu key → F4 → F2

Syntax < Long > < Short >

| | | |
|-----------|-------------------------------------------------------------------------------------|-----------------------------------------------|
| | :trigger:couple <NR1> | :trig:coup <NR1> |
| | :trigger:couple? | :trig:coup? |
| Parameter | <NR1> | Coupling mode |
| | 1 | AC |
| | 2 | DC |
| Note | Before using this command, select the edge or pulse trigger. See the example below. | |
| Example | :trigger:type: 0 :trigger:couple 1 | Selects the edge trigger and AC coupling mode |

:TRIGger:FREQuency 

| | | |
|-------------|----------------------------------------|--------------------------|
| Description | Returns the trigger frequency readout. | |
| Syntax | < Long > :trigger:frequency? | < Short > :trig:freq? |

:TRIGger:LEVel  

| | | |
|-------------|----------------------------------------------------------------------|--------------------------------------------|
| Description | Selects or returns the trigger level. Same as: Trigger level knob | |
| Syntax | < Long > :trigger:level <NR3> :trigger:level? | < Short > :trig:lev <NR3> :trig:lev? |

| | | |
|-----------|------------------|------------------------------|
| Parameter | <NR3> | Trigger level in voltage |
| Example | :trigger:level 0 | Sets the trigger level at ±0 |

:TRIGger:MODE  

| | | |
|-------------|-------------------------------------------------------------------|--|
| Description | Selects or returns the trigger mode. Same as: Trigger key → F5 | |
|-------------|-------------------------------------------------------------------|--|

| | | |
|----------------------|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Syntax | < Long > :trigger:mode <NR1> :trigger:mode? | < Short > :trig:mod <NR1> :trig:mod? |
| Parameter | <NR1> 1 2 | Trigger mode Auto Normal |
| Note | Before using this command, select the edge or pulse trigger. See the example below. | |
| Example | :trigger:type: 0 :trigger:mode 2 | Selects the edge trigger and normal trigger mode |
| :TRIGger:NREJ | |  → →  |
| Description | Turns the noise rejection mode on/off. Same as: Trigger key → F4 → F4 | |
| Syntax | < Long > :trigger:nrej <Boolean> :trigger:nrej? | < Short > :trig:nrej <Boolean> :trig:nrej? |
| Parameter | <Boolean> | Noise rejection mode off on |
| Note | Before using this command, select the edge or pulse trigger. See the example below. | |
| Example | :trigger:type 0 :trigger:nrej 0 | Selects the edge trigger and turns off the noise rejection |

:TRIGger:PULSe:MODE**Set** →→ **Query**

| | | | | |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-------|------|
| Description | Selects the trigger mode in the pulse trigger. Same as: Trigger key → F1(Pulse) → F3 | | | |
| Syntax | < Long > < Short > :trigger:pulse:mode <NR1> :trig:puls:mod <NR1> :trigger:pulse:mode? :trig:puls:mod? | | | |
| Parameter | <NR1> | Mode | <NR1> | Mode |
| | 0 | < | 2 | = |
| | 1 | > | 3 | ≠ |

| | | | | |
|------|-----------------------------------------------------------------------------|--|--|--|
| Note | Before using this command, select the pulse trigger. See the example below. | | | |
|------|-----------------------------------------------------------------------------|--|--|--|

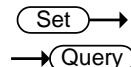

| | | |
|---------|-----------------------|------------------------------------------|
| Example | :trigger:type 2 | Selects the pulse trigger |
| | :trigger:pulse:mode 0 | and < (smaller than) as the trigger mode |

:TRIGger:PULSe:TIME**Set** →→ **Query**

| | | | | |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|--|--|
| Description | Selects the trigger time in the pulse trigger. Same as: Trigger key → F1(Pulse) → F3 → Variable knob | | | |
| Syntax | < Long > < Short > :trigger:pulse:time <NR3> :trig:puls:tim <NR3> :trigger:pulse:time? :trig:puls:tim? | | | |
| Parameter | <NR3> | Trigger time | | |
| | 20e ⁻⁹ ~ 10 | 20ns ~ 10s | | |

| | | | | |
|------|-----------------------------------------------------------------------------|--|--|--|
| Note | Before using this command, select the pulse trigger. See the example below. | | | |
|------|-----------------------------------------------------------------------------|--|--|--|

| | | |
|---------|-----------------------|-----------------------------------|
| Example | :trigger:type 2 | Selects the pulse trigger |
| | :trigger:pulse:time 1 | and sets the trigger time as 1sec |

:TRIGger:REject

Description Selects the trigger rejection filter.

Same as: Trigger key → F4 → F3

Syntax

< Long >

< Short >

:trigger:reject <NR1>

:trig:rej <NR1>

:trigger:reject?

:trig:rej?

Parameter

<NR1>

Rejection filter

0 off

1 LF

2 HF

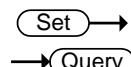

Note

Before using this command, select the edge or pulse trigger. See the example below.

Example

:trigger:type 0

Selects the edge trigger
and LF rejection filter

:TRIGger:SLOP

Description Selects the trigger slope.

Same as: Trigger key → F4 → F1

Syntax

< Long >

< Short >

:trigger:slop <NR1>

:trig:slop <NR1>

:trigger:slop?

:trig:slop?

Parameter

<NR1>

Trigger slope

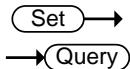

0 + (positive)

1 - (negative)

Note

Before using this command, select the edge or pulse trigger. See the example below.

| | | |
|---------|------------------------------------|-----------------------------------------------------|
| Example | :trigger:type 0 :trigger:slop 1 | Selects the edge trigger and negative trigger slope |
|---------|------------------------------------|-----------------------------------------------------|

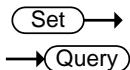

**:TRIGger:SOURce**

| | |
|-------------|------------------------------------------------------------------|
| Description | Selects the trigger source channel. Same as: Trigger key → F2 |
|-------------|------------------------------------------------------------------|

| | | |
|--------|-----------------------|------------------|
| Syntax | < Long > | < Short > |
| | :trigger:source <NR1> | :trig:sour <NR1> |
| | :trigger:source? | :trig:sour? |

| Parameter | <NR1> | Trigger source | <NR1> | Trigger source |
|-----------|-------|----------------|-------|----------------|
| | 0 | Channel 1 | 2 | Line |
| | 1 | Channel 2 | 3 | External input |

| | | |
|---------|-------------------|-----------------------------------------|
| Example | :trigger:source 0 | Selects Channel 1 as the trigger source |
|---------|-------------------|-----------------------------------------|

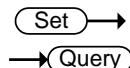

**:TRIGger:TYPe**

| | |
|-------------|--------------------------------------------------------|
| Description | Selects the trigger type. Same as: Trigger key → F1 |
|-------------|--------------------------------------------------------|

| | | |
|--------|---------------------|-----------------|
| Syntax | < Long > | < Short > |
| | :trigger:type <NR1> | :trig:typ <NR1> |
| | :trigger:type? | :trig:typ? |

| Parameter | <NR1> | Trigger type | <NR1> | Trigger type |
|-----------|-------|--------------|-------|--------------|
| | 0 | Edge | 2 | Pulse |
| | 1 | Video | | |

| | | |
|---------|-----------------|-------------------------------|
| Example | :trigger:type 0 | Selects the edge trigger type |
|---------|-----------------|-------------------------------|

:TRIGger:VIDeo:FIELd

Description Selects the trigger field in the video trigger.

Same as: Trigger key → F1(Video) → F5

Syntax

< Long >

< Short >

:trigger:video:field <NR1>

:trig:vid:fiel <NR1>

:trigger:video:field?

:trig:vid:fiel?

Parameter

| | |
|-------|-------|
| <NR1> | Field |
|-------|-------|

| | |
|-------|-------|
| <NR1> | Field |
|-------|-------|

| | |
|---|------|
| 0 | Line |
|---|------|

| | |
|---|------|
| 2 | even |
|---|------|

| | |
|---|-----|
| 1 | odd |
|---|-----|

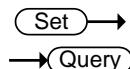

Note

Before using this command, select the video trigger. See the example below.

Example

:trigger:type 1

Selects the video trigger and odd trigger field

:TRIGger:VIDeo:LINE**Description**

Selects the trigger field line in the video trigger.

Same as: Trigger key → F1(Video) → F5 → Variable knob

Syntax

< Long >

< Short >

:trigger:video:line <NR1>

:trig:vid:lin <NR1>

:trigger:video:line?

:trig:vid:lin?

Parameter

| | |
|-------|------------|
| <NR1> | Line range |
|-------|------------|

| | |
|-------|------------|
| <NR1> | Line range |
|-------|------------|

| | |
|---------|----------|
| 1 ~ 263 | NTSC odd |
|---------|----------|

| | |
|---------|---------------|
| 1 ~ 313 | PAL/SECAM odd |
|---------|---------------|

| | |
|---------|-----------|
| 1 ~ 262 | NTSC even |
|---------|-----------|

| | |
|---------|----------------|
| 1 ~ 312 | PAL/SECAM even |
|---------|----------------|

Note

Before using this command, select the video trigger, TV standard, and odd or even trigger field. See the example below.

| | | |
|---------|-----------------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| Example | :trigger:type 1 :trigger:video:type 0 :trigger:video:field 1 :trigger:video:line 313 | Selects the video trigger, PAL, odd field triggering, and line 313 |
|---------|-----------------------------------------------------------------------------------------------|--------------------------------------------------------------------|

 Set Query**:TRIGger:VIDeo:POLarity**

| | | |
|-------------|---------------------------------------|---------------------|
| Description | Selects the video trigger polarity. | |
| | Same as: Trigger key → F1(Video) → F4 | |
| Syntax | < Long > | < Short > |
| | :trigger:video:polarity <NR1> | :trig:vid:pol <NR1> |
| | :trigger:video:polarity? | :trig:vid:pol? |

| | | |
|-----------|-------|----------|
| Parameter | <NR1> | Polarity |
| | 0 | Positive |
| | 1 | Negative |

| | | |
|------|-----------------------------------------------------------------------------|--|
| Note | Before using this command, select the video trigger. See the example below. | |
|------|-----------------------------------------------------------------------------|--|

| | | | |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|-------------------------------------------------|
| Example | :trigger:type 1 :trigger:video:polarity 0 | | Selects the video trigger and positive polarity |
| |  Set  Query | | |

:TRIGger:VIDeo:TYPe

| | | |
|-------------|-----------------------------------------------|--|
| Description | Selects the TV standard in the video trigger. | |
| | Same as: Trigger key → F1(Video) → F3 | |

| | | |
|--------|---------------------------|---------------------|
| Syntax | < Long > | < Short > |
| | :trigger:video:type <NR1> | :trig:vid:typ <NR1> |
| | :trigger:video:type? | :trig:vid:typ? |

| | | | | |
|-----------|-------|------|-------|-------|
| Parameter | <NR1> | Type | <NR1> | Type |
| | 0 | PAL | 2 | SECAM |
| | 1 | NTSC | | |

Note Before using this command, select the video trigger. See the example below.

Example :trigger:type 1 Selects the video trigger
 :trigger:video:type 0 and PAL standard
